LAB EXERCISE 1

Integrate Git with Jenkins

Objective: Integrate Git with Jenkins

**Tools required:** Git and Jenkins

Prerequisites: You need to have jenkins installed in order to proceed with this demo.

Steps to be followed:
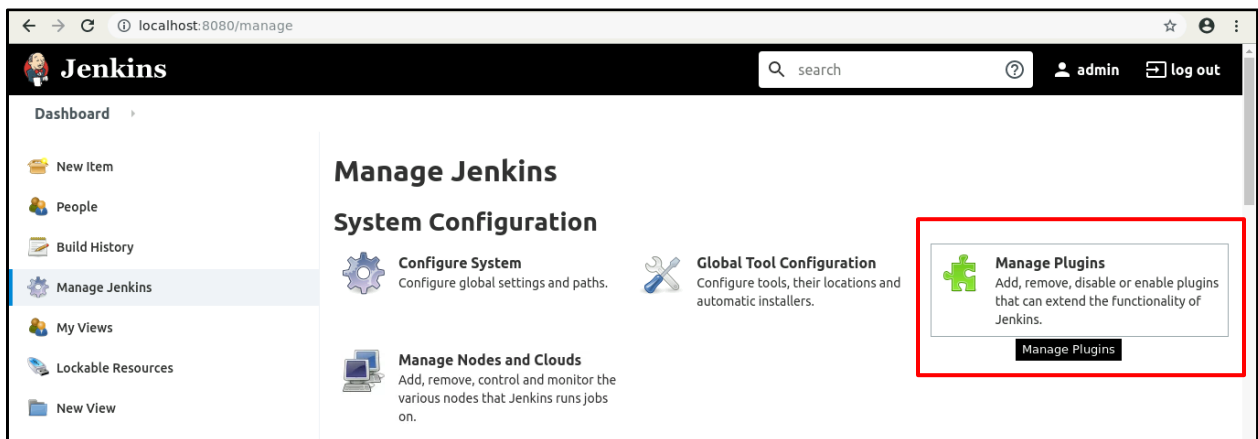

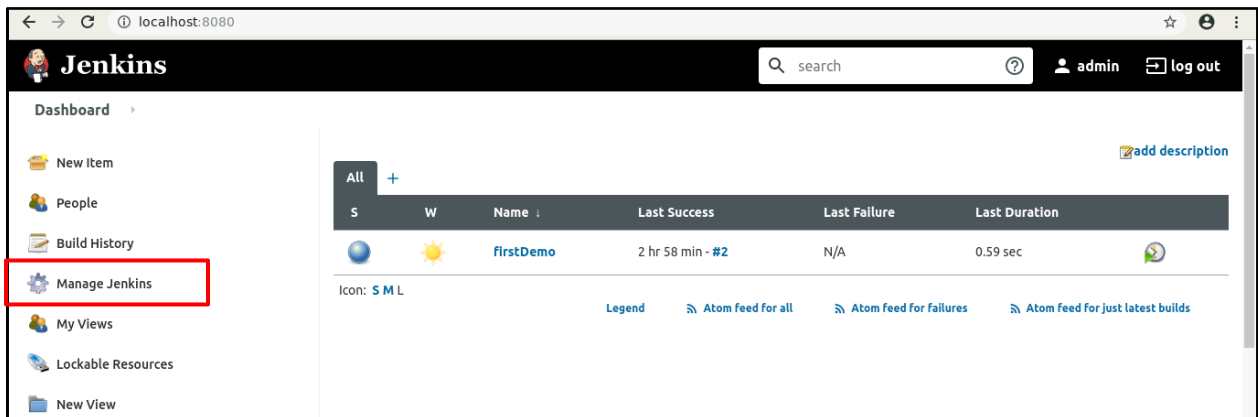

1. Install Git plugin

Step 1: Installing Git plugin

1.1 Open the browser, and go to **Jenkins dashboard** by typing **localhost:8080** in your browser.

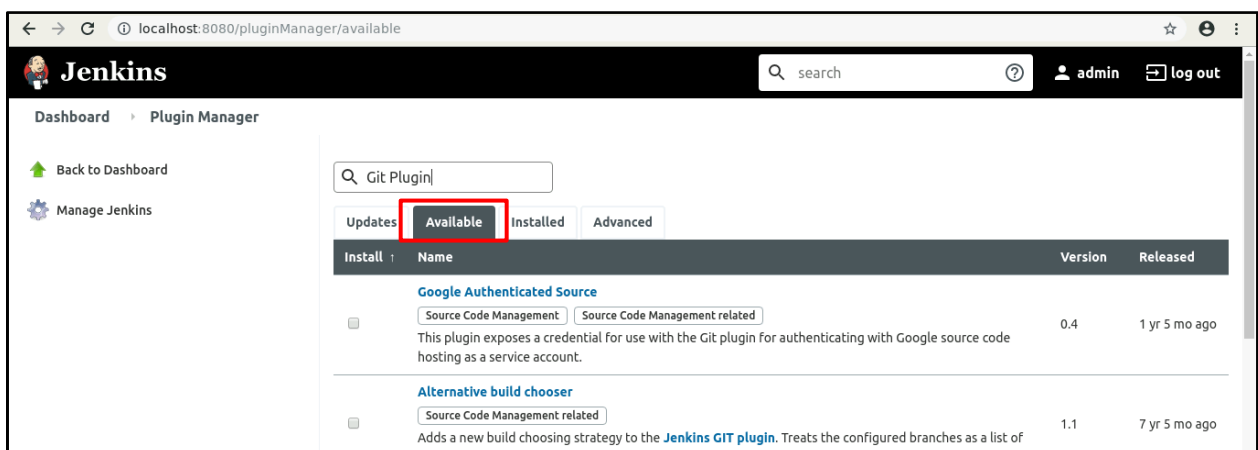

1.2 Provide the credentials, and click on **Sign in**.

1.3 Click on **Manage Jenkins**. From the list of options, choose **Manage Plugins**.

1.4 Under the **Available** tab, select **Git Plugin**.

1.5 Click on **Install without restart,** and the plugin will be installed.

1.6 To verify whether the plugin is installed, go to **Dashboard,** click on **Manage Jenkins**, select **Manage Plugins**, go to **Installed** tab, and search for Git plugin.
